[Petition · FORCE the Government to ACT NOW to Meet Legally Binding Targets for River Health - United Kingdom · Change.org](https://petition.niddactiongroup.org)

This campaign concerns the decision of the Supreme Court in the Costa Beck (North Yorkshire) case pursued on behalf of Pickering Anglers.

The Court ruled that the Government's nationwide River Basin Management Plans were unlawful in failing to set out how the Government is going to restore every single river and lake to good health to meet legally binding targets under the Water Framework Directive by 2027.

This matter will come to a head after January 2025 when the Court of Appeal deliberates, as the Former Government have chosen to Appeal rather than correct their own and the Environment Agencies gross failures over many years.

Please sign the petition if you feel able to do so. No need to make donations or anything else unless you should wish to do so.

David
