

NAG Public Meeting February 25th

Focused on the plans by Yorkshire Water and the Environment Agency to improve the POOR status of our designated bathing water at the Lido, a range of experts, environmental groups and committed volunteers will:

- deliver short presentations,
- respond to questions and
- display posters of their work and their proposals for reducing pollution in the river Nidd - to benefit humans and wildlife

This is an opportunity to:

- hear what is said (about the whole Nidd Catchment),
- give your views,
- find out what NAG and other groups are doing, and
- learn how you can make your personal contribution in 2025.

NAG will hold its own brief AGM during the meeting

A more detailed agenda for the meeting will be published in due course.

Bathing Water Status for the Nidd:

...now it's your move!

**Public consultation on latest plans to protect the
river from pollution**

Tuesday 25th February 2025

In April 2024, the Lido bathing area gained **Bathing Water Status**.

Yorkshire Water are now required to manage water quality 5km upstream of the Lido. The Environment Agency rated water quality as 'POOR'.

In this event, find out about:

1. Yorkshire Water's plans; 2. Results of water quality testing by EA and others; 3. State-of-the-art research on pollution (science projects); 4. How YOU can help ensure effective action by all concerned.
